Profile

UI/UX designer with frontend skills, creating user-centered digital experiences using Figma, including wireframes, user flows, and high-fidelity prototypes. Translates design concepts into responsive and accessible interfaces using HTML and CSS, ensuring consistency across devices. Applies strong usability principles and structured problem-solving, iterating designs based on feedback, user needs, and real-world constraints while clearly documenting the design process through case studies.

Work Experience

UIUX Designer Intern — March 2026 - Present
D5N Digital Solutions | Malappuram, Kerala

- Designed responsive website interface and interactive prototypes for client project.
- Translated UI designs into functional frontend pages using HTML, CSS, and Bootstrap.
- Collaborated with developers to ensure usability, consistency, and performance.
- Supported UI testing and interface optimization to enhance user experience.

Projects

November 2025 - April 2026

- Designed a habit tracking mobile app using Figma, creating end-to-end user flows, wireframes, and interactive prototypes for MVP validation.
- Developed and deployed a personal portfolio on GitHub, implementing responsive UI using HTML, CSS, and Bootstrap.
- Redesigned and coded an existing logistics website, improving layout clarity and user experience.
- Supported UI testing and interface optimization to enhance user experience.
